New Drihi-2 (India); The 2nd November, 1953.

K. MITRA,

for Registrar General, India.

### FODAY'S BEST INVESTMENT FOR SMALL SAVERS

## NATIONAL SAVINGS CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity, interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income.

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000 and two joint holders upto Rs. 50,000/-

Deposits accepted in multiples of Rs. 100 upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per annum, free of income-tax and super-tax and which is not taken into account in assessing the total taxable income, is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay, Calcutta, Delhi and Madras and Branches of the Imperial Bank of India at other places transacting treasury business. Deposits are also accepted at all Treasuries in Part 'A' States at places where the Imperial Bank does not transact treasury business and at all Sub-Treasuries in Part 'A' States; also at Treasuries at Bhuj (Kutch), Imphal (Manipur) and Coorg-Mercare (Coorg).

<sup>\*</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>†</sup> Figures not available,

Explanation of symbols used:—B.=Births; B.R.=Birth Rate; C.=Cholera; S.=Smallpox; P.=Plague; F.=Fevors; D.D.=Dysentery and Diarrhoea; R.D.=Respiratory Diseases; M.D.=Maternal Deaths; D.R.=Death Rate; I.D.=Infantile Deaths (included in total deaths).

#### REMARKS

The figures of births and deaths shown in this statement for week ending the 10th October, 1953, relate to 200 towns with an estimated population of 25,722 thousands. The total number of towns is 296 and their population is 36,160 thousands. Thus 67% of the total number of towns representing 71% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 19,393 and 9,357 representing birth and death rates of 39.2 and 18.9 per thousand of population respectively.

(A) States (Parts A & C):—The data here relate to 170 towns with an estimated population of 22,137 thousands. Information about Bihar and West Bengal could not be included. The total number of towns is 250 and their population is 30,810 thousands. Thus 68% of the total number of towns representing 72% of the total population is covered. The numbers of births and deaths

recorded in these towns were 17,367 and 8,381 representing birth and death rates of 40.8 and 19.7 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(B) States (Part B):—The data here relate to 30 towns with an estimated population of 3,585 thousands. The total number of towns is 46 and their population is 5,350 thousands. Thus 65% of total number of towns representing 67% of total population is covered. The numbers of births and deaths recorded in these towns were 2,026 and 976 representing birth and death rates of 29 3 and 14.2 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
